- Html

EXPERIENCE

Jan 2023

[E-commerce Product-Page](#)

Tech: React, Typescript.

- Build a functional and responsive app, from the e-commerce-product-page challenge of Frontend Mentor Challenge.
- Made a fully responsive app using the BEM methodology to make the code easier to read.
- Made a functional app integrating Typescript to the React project.
- Good father-son communication between components to make the app fast and fully functional.
- Used useState Hook to make the app work.

Nov 2022

[Portfolio](#)

Tech: React, FormatJs API.

- Build a functional and fully responsive app.
- Build a multi-language page using the FormatJs API.
- Developed the multi-language web using the React useContext hook, so all the page components can communicate with the API.
- Save the last used language in local storage, so when you reload the page, you keep the last language you used.

Oct 2022

[Advice Generator](#)

Tech: React, restful API.

- Made from 0 to 1 the Advice-Generator-App Frontend Mentor challenge.
- Consume data from the AdviceSlip API.
- Used useState and useEffect React hooks.

Sep 2022

[To-do App](#)

Tech: React, bootstrap.

- Build from 0 to 1 a fully functional app.
- Used React Hooks like useState.
- Used Bootstrap framework to make a fully responsive app.

EDUCATION

Apr 2022

[Responsive Web Design](#), freeCodeCamp.
